IRIDIUM SAVER

DENSO Iridium Saver Spark Plugs

The Iridium Spark Plug for Gas Engines

Why DENSO?

Foremost leader in gas engine spark plug technology

DENSO's brand name is synonymous with high-quality premium products

DENSO's quality processes are unsurpassed in the industry and guarantee product reliability

Prolong plug replacement time by using highly reliable Iridium Saver spark plugs.

Iridium alloy was developed and patented by DENSO, offering a high melting point which dramatically improves wear resistance compared to other Iridium plugs.

IRIDIUM SAVER

Features: High-efficiency, long life spark plug designed specifically for harsh environments found in today's high compression, lean burn gas engines. Uses patented "Iridium" technology, creating unmatched durability and performance. The term "Saver" signifies the reduction in the maintenance costs achieved by extending plug-life and preventive maintenance intervals.

Benefits:

- DENSO Patented Iridium = Better wear and resistance for a long life
- 360° Laser Welding = Uniform weld around the base of electrode ensures stability
- Powder Sealing + Hot Lock = Robust caulking strength for high compression
- Monolithic Resistor = Stress resistant with better adhesion at high temperatures
- High Dielectric Ceramic =Denser ceramic increases insulation properties

- Special Nickel Plating = Better corrosive resistance than the competition

IRIDIUM SAVER PERFORMER

Features: The cross groove design (M18mm Plug), meets OEM requirements for durability and performance in today’s pre-chamber engines. The cross groove creates four small electrodes which improves sparking performance and suppresses dispersion in voltage value, for an outstanding decrease in voltage required.

Benefits: All of the benefits of the Iridium Saver plus improved sparking performance, suppressing dispersion in voltage value.

IRIDIUM SAVER DDI

Features: This spark plug is packing double Iridium for customers seeking the ultimate in durability, especially for bio-gas applications.

Benefits: All of the benefits of the Iridium Saver plus ultimate durability!

DDI plugs have larger imbedded Iridium pads to far outlast the competition
